

# Diploma in Interior**Design**

## Coalescing form and function to make life simpler

Interior designers build interior spaces which are a perfect blend of functionality, safety, and elegance for an array of buildings: offices, independent bungalows or houses, apartments, airport terminals, shopping malls, and even restaurants. They are responsible to decide on and even state the color, finish, fabric, texture, pattern, furniture, flooring, electrical fittings, wall coverings, lighting, and much more to create stylish interiors for buildings.

At Bonfire Institute of Design, we equip our students to shatter the glass ceilings of rigid customs in which individuals visualize a shopping mall, a home or a workplace. Working with industry wizards, we teach the skills that one needs in order to practice as an Interior Design professional endowing each of our students with an exhilarating and proficient portfolio of work.
